

AQUADAM FLOOD CONTROL

PROTECTING YOUR COMMUNITIES, BUSINESSES, AND CRITICAL INFRASTRUCTURE

As flood waters approach, you need a quick and effective solution to defend your property and redirect water away from valuable infrastructure. AquaDam® is a unique temporary protective solution that uses any source of available water to hold back and control flooding.

The speed and convenience of AquaDams for flood control allows homeowners and emergency responders to protect large areas from flood damage with minimal effort. More efficient and cost-effective, two laborers can install a 100ft AquaDam® in 20 minutes, ten times faster than a standard sandbag berm and at only an estimated 25% of the cost. **For up-to-date AquaDam® specifications, please scan the QR code.**

AFFORDABLE FLOOD SOLUTION

AquaDams offer 25% or more savings over sandbags and can be cleaned and reused with proper handling.

DEPLOYS QUICKLY AND EASILY

AquaDam® is up to ten times faster to install than sandbags and requires only two workers for proper installation.

PROTECTS THE ENVIRONMENT

AquaDams can be deflated, re-used, and kept out of landfills, significantly reducing the impact on our environment.
